

It's a fantastic class. I'm really glad I came.

Stephanie Roberson, Local 69

This course is great for basic electronics, sound, and more in the A.V. industry. I've learned quite a bit about techniques and best practices.

Gregory MacDonald, Local 927

I knew nothing coming in, and I'm learning a lot.

Mandy McCrae, Local 46

This is a great A.V. introduction. It's focused on getting through the test, and definitely what we need to become certified.

Mike Bianca, Local 417

The books and instruction from someone who has done this in real life make me confident about taking the CTS Certification test.

Chris Walters, Local 5
